Short description of host unit

The GI endoscopic center carry out endoscopic series diagnosis and treatment of early gastrointestinal cancer, diagnosis and treatment of esophageal varices, dilatation and stent placement of digestive tract stenosis, NOTES pancreatic abscess debridement, EUS guided intervention, ERCP, ESD, POEM, TIPS and vascular intervention. The number of patients diagnosed and treated by our endoscopic center is increasing year by year. In 2018, there are more than 110000 cases, including nearly 65000 cases of painless gastroenteroscopy, nearly 2800 cases of ERCP. Our ERCP diagnosis and treatment group has 15 members and 7 chief physicians, the leader of ERCP group is professor Youxiang Chen. This group is mainly focusing on minimally invasive treatment of biliary track and pancreatic track diseases. There are 51 beds in this sub specialty which carry out the diagnosis and treatment of cholelithiasis, malignant tumor (cholangiocarcinoma, pancreatic cancer, hilar metastasis cancer, etc.) complicated with biliary obstruction and / or pancreatic duct obstruction. In recent years, more than 2500 ERCP cases have been carried out per year. The success rate of the operation was over 98%, and the incidence of complications was very low. The 24-hour emergency green channel of ERCP for acute biliary pancreatitis and acute obstructive suppurative cholangitis was opened, and many critical ill patients were successfully treated.

Training periods: Module1: Jan 2020 – June 2020;
Module2: July 2020 – December 2020 (6 months)

Number of slots: 4 (per module)

Documentions needed: Certificate of doctorate and notarial materials, GI certificate, Degree certificate and notarial materials, Visa requirements, work permit will be applied after arriving, health certificate

Average living cost per month (est.): 250 US\$ / month for accommodation, 240 US\$ / month for meals, 100 US\$ / month for public transport

Local arrangements: Host unit will be able to suggest accommodation nearby training ground, Host unit will be able to provide meal vouchers

*Department of Gastroenterology, the First Affiliated
Hospital of Nanchang University*

Program overview

- 1) Basic knowledge course: anatomy and physiology of pancreatobiliary tree; indications and contraindications for ERCP; procedure complications and risk stratification; appropriate informed consent procedures and so on.
- 2) Patients considerations and physician behavior during ERCP
- 3) Post ERCP management
- 4) Recognition and management of complications
- 5) Basic techniques training
- 6) Therapeutics techniques training
- 7) Advanced ERCP training

WEO Fellowship Program
